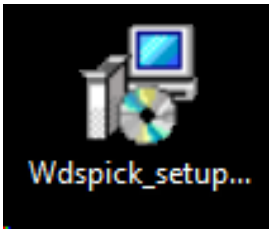
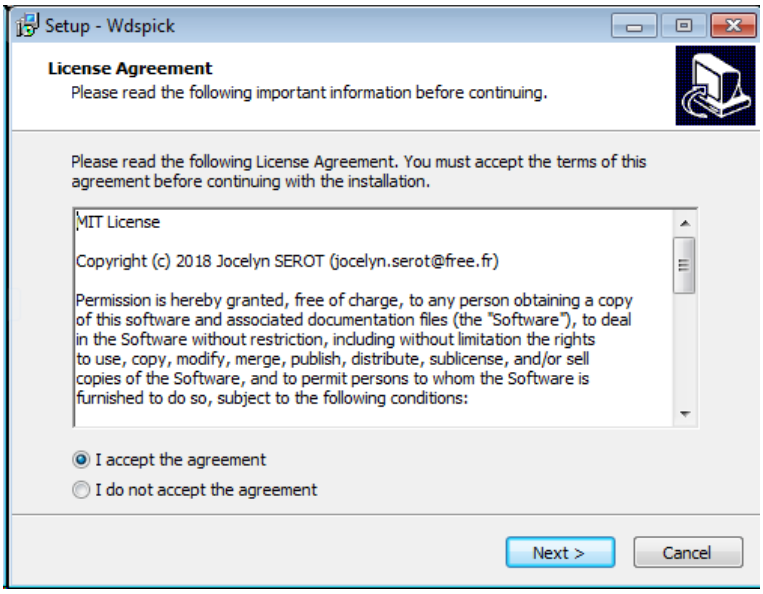
WDSPICK INSTALLER GUIDE
v2.2 - May 2018
J. Sérot (jocelyn.serot@free.fr)

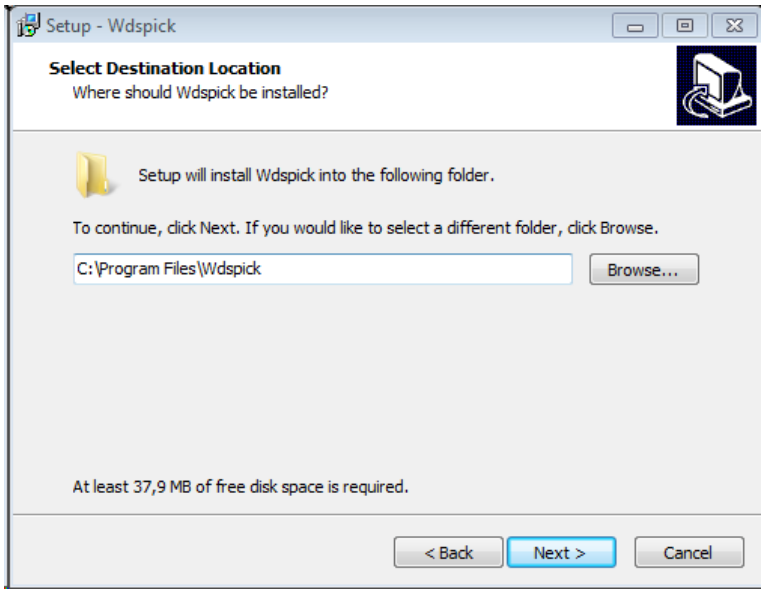
STEP 1 - Click on the self-installer icon



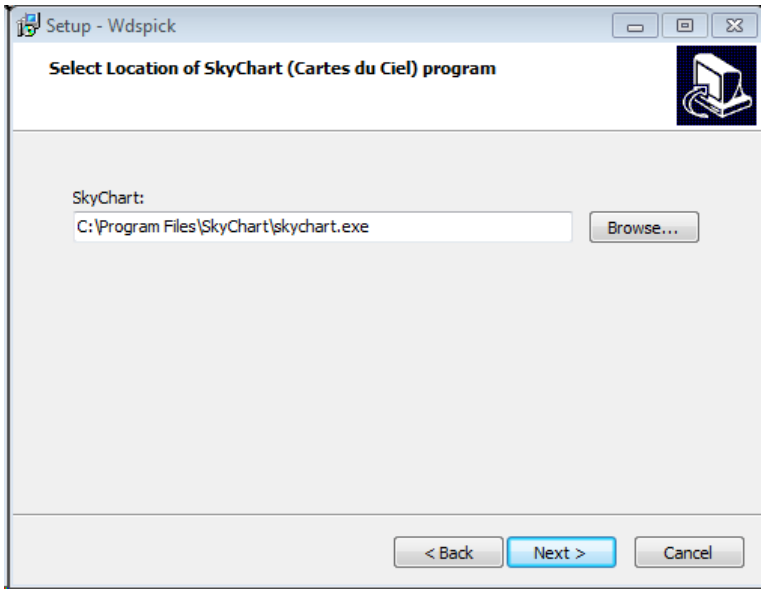
STEP 2 - Read and accept licence agreement



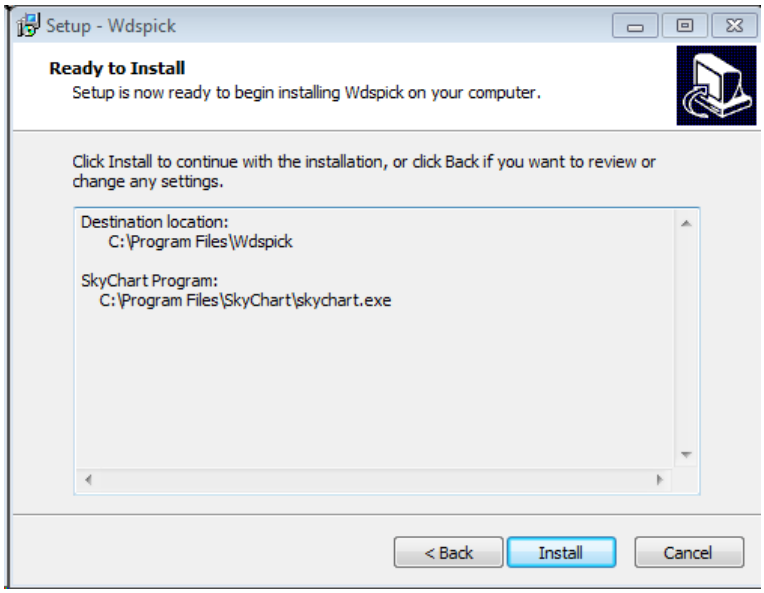
STEP 3 - Select installation directory



STEP 4 - If you wish to use WdsPick in conjunction with the *SkyChart* (« Cartes du Ciel ») program (to take advantage of the « Goto » facility), specify the location of this program. If you don't have *SkyChart* installed, you install it latter, but you will have to adjust the *wdspick.ini* file to reflect the installation path.



STEP 5 - Ready to install

Check all items and click Install button. This will
- create an install directory at the specified location (here : C:\Program Files\Wdspick)
- create an .ini file for the application remembering these settings


At the end of the install, you'll have to possibility to start the application
